Luka Pančić

Date of birth: 2003/09/17 | Place of birth: Gradiška, Bosnia and Herzegovina | Mobile phone: +387 671208243 | Email address: lpancic03@gmail.com | Website: www.lukapancic.com

👤 About me

During my studies, I gained knowledge mostly in object-oriented programming and computer networks, and in my free time I independently learned reverse engineering and web development. I am also a volunteer and now a member of Supervisory Board of local committee of EESTEC in Banja Luka, which has contributed to the development of my leadership skills and soft skills. I am a motivated person, eager to learn new skills as well as to further improve the ones mentioned above. Through my experience in freelancing I've learnt about various industries, developed sales skills and further improved my soft and communicational skills.

🎓 Education & Training

Software Engineer

2022/10/01 – Current

Faculty of Electrical Engineering | Banja Luka, Bosnia and Herzegovina

💼 Work experience

Internship

2026/03/29 – 2026/04/24

m:tel | Banja Luka, Bosnia and Herzegovina

- Learned about Dev Ops
- Set up server hardware and software for monitoring
- Learned about Network Engineering
- Learned about telecommunications infrastructure and engineering behind it

Freelancing

2026/02/02 – Current

Luka Pančić | Banja Luka, Bosnia and Herzegovina

- Developing websites, web applications and other software
- Developed sales skills and experience through communication with a number of clients

🤝 Volunteering

Vice President of EESTEC LC

2025/05/20 – 2026/06/01

Banja Luka

Banja Luka

As Vice President and Treasurer, I developed leadership skills as well as experience in financial management and budgeting. As a normal member, I represented our committee at international events such as Congresses and participated in workshops and other activities.

Supervisory Board of EESTEC LC

2026/06/01 – Current

Banja Luka

Banja Luka

As part of the supervisory board, my task is to monitor the actions and decisions of new board of EESTEC LC Banja Luka, specifically of the Vice Chairperson, to help them get better at doing their tasks and provide any assistance when needed.

Honours and Awards

3rd Place Winner

2025/11/24

Abyss Hackathon

Me and Miloš Petrović competed in a hackathon we found through EESTEC in which we developed AI powered widgets/applets. Our project was a Mock Test Generator, to which one could feed information from PDFs and would receive various types of tests. (Multi-choice, Fill in the blanks...). It received 3rd place and was a community favorite widget.
